Subject: Science Symposium

Good evening Dr. McKinnon,

Long time no talk! I hope you've been well☺ I thought I'd send you an email just thanking you again for everything you've done to help me with the analysis of the suspected variable star, SAO 155490. I believe Mr. Edwards has mentioned that I entered the Manitoba Schools Science Symposium last weekend and won two awards for presenting my technical paper. I really appreciate all the time and work you've put into helping me with the project. I know that it wouldn't have been possible without yours and Mr. Edwards help☺ Thank you again.

Mr. Edwards mentioned to me that you'd like a copy of the final project so I've attached it.

Is it still possible to continue analyzing the star? I understand you're very busy and will understand if this isn't possible. Please let me know!

Thank you again,
Take care,
Alaina
